

PORT CHILKOOT

Distillery

HAINES, ALASKA

Our Alaskan rum is made in the traditional fashion, with a few distinct modifications that make it unique to Port Chilkoot Distillery. Fermented from 100% organic Columbian Panela Cane sugar and yeast, Seaworthy is double distilled in small batches on site. Once off the still, we age Seaworthy in our old Boatwright Bourbon oak barrels to add extra rich and complex flavors, infusing the rum with the flavor of Alaska whiskey and softness of the wood. The resulting liquid is golden and smooth, with notes of toasted sugarcane and caramel. We chose to produce an aged rum specifically to capture these subtleties – with a lower proof than white rum and our meticulous aging process, Seaworthy rum is unlike any other.
